

Filing Date: 10/24/2003

This technical drawing is a cross-sectional view of a mechanical assembly, possibly a valve actuator or a similar fluid control device. The main body of the device is labeled 1. A central shaft or piston rod, labeled 2, passes through the center. A coiled spring, labeled 3, is positioned around the shaft. The shaft is connected to a piston or plunger, labeled 4, which is seated within a cylinder. The piston is linked to a lever or arm, labeled 5, which is part of a complex linkage system. This system includes various other components labeled 6 through 24, such as guides, supports, and connecting rods. The diagram uses different hatching patterns to represent various materials or cross-sections of the components. Arrows indicate the direction of movement or force transmission within the assembly.
